Queen Election At Dance

PAM SPERO

Future nurse Pam Spero has veried interests ranging from sewing to sports. Five feet four inches tall and weighing 107 pounds, Pam likes active sports but also takes an interest in the yearbook and says she is minoring in "lounge."

LINDA POLCZYNSKI

Psychology major Linda Polczynski is also a cheerleader and sports fan. At five feet five inches Linda's favorite sport is swimming, she also loves to dance. Linda's eyes are blue and her hair is brown. She weighs 120 pounds.

SANDY WILSON

Queen candidate Sandy Wilson stands 5'5" tall and weighs 118 pounds. She has brown hair and eyes and likes to bowl and especially to swim. Sandy also likes to sew. A mathematics major, she is active in such student activities as Newman Club and Pi Sigma Kappa.

DONNA COX

A blonde with blue-green eyes, candidate Donna Cox weighs 125 pounds and is five feet seven and a half inches tall. She is majoring in medical technology. Donna also likes sports (football and basketball) with a sideline interest in art. She is a member of Pi Sigma Kappa, Drama Club, and Newman Club.

NITA GRISH

At five ft. two in. and 110 lbs. Nita is the smallest of the queen contenders. Her hair is dark brown and here eyes are green. Nita likes to sew, dance, and swim. She is a member of the Newman Club. Nita is majoring in sociology with a minor In English.

"THE VOICE OF THE STUDENTS - - BY THE STUDENTS"

PURDUE CALUMET

Vol. 14 - No. 5 PURDUE UNIVERSITY CALUMET CAMPUS, HAMMOND, INDIANA Wednesday, November 30, 1966

Annual Student Congress Winter Semi-Formal will be on Friday, December 23, at the St. John Panel Room in Whiting.

Starting at 8, "Mistletoe Madness" will end at midnight. The cost of tickets has tenatively been set at $4.00.

Ladies may wear either long or short dresses and suits are appropriate dress for the gentlemen.

Debaters Open Season At Butler Tournament

The Calumet Campus' new debating team will open its 1966-67 season at Butler University Saturday, Dec. 3. The team consisting of Doug Fix, John Gerovac, Jim Austgen, and Jeff Penns will compete in the novice tournament for a trophy prize.

The debate team is sponsored by the new Ciceronian Society. The Society is sponsoring a get acquainted reception for anyone interested in any form of public speaking. The new organization plans to set up a community speakers bureau for those interested in straight oratory. Plans are also afoot to aid those interested in creative and dramatic readings.

The society reception will be held today in the faculty section of the main floor lounge from 1 p.m. to 4 p.m. Coffee and cookies will be served and discussion of speaking interests with club members will enlighten those interested in the organization's activities.

Society sponsor John J. Makay stated "The idea behind the reception is to bring potential talent to one place where they can become acquainted with our future plans and present goals."

Organization president Doug Fix added "The club is not just for debators, but for anyone who likes to speak and be heard."

Pi Sigma Kappa would like to thank the ARET boys for their donation of two baskets of canned goods, SCOPE for their $10 check, Newman Club for their donation of canned goods, and all other students who donated canned goods or money.

And a special thanks to Gene Wineger for special services rendered.

Thank-you,
Pi Sigma Kappa

Homecoming Highlights Pre Holidays

By Tom Carlin,
Student Body President

Spirit, that undefinable ecstatic feeling, has caught up with just about everyone here at PUCC. The talk one hears in the halls or in the lounge is of who's going to build the best float, or which of the five pretty girls is going to be selected queen, or is our basketball team really that good?

These questions will all be answered on Saturday as Purdue Calumet proudly presents its first annual Homecoming. But this isn't just another homecoming. It has more excitement, more color and more of everything than anything that has ever been held at PUCC. The student body has gone all out in its support and enthusiasm for this gala event.

Parade

The festivities begin with the traditional parade at 10:30 a.m. thru downtown Hammond. Our parade will be a part of Hammond's annual Christmas and will be seen by upwards of 100,000 people. The parade will feature over 40 floats, 10 marching bands, the famous Golden Girl and Silver Twins from Lafayette, and 23 floats and decorated cars from our campus. The queen candidates will ride in open convertibles and will be truly representative of the student body of Purdue Calumet. Circle K, Newman Club, SCOPE, Student Council, and The Theatre Company are all entering imaginative floats and some of the decorated cars will be from Pi Sigma Kappa, the cheerleaders, and a special delegation from the ARET department.

Bonfire

A mammoth bonfire and pep rally will begin promptly at 6 p.m. to send off the team with as much spirit as possible. The rally will be held at the north end of the campus and is being conducted by the cheerleaders.

The Big Game

The most thrill-packed game of the year has been scheduled for the beautiful new Munster Fieldhouse. The game will pit the fast-breaking Pipers against the Marion College Knights at 7 p.m.

Victory Dance

The highlight of the Victory Dance will be the crowning of the 1966 Homecoming Queen. Voting will be done on the back of the dance ticket and will be announced about eleven o'clock. As you enter the door just check the girl's name that is printed on the back of the ticket and that will constitute a vote for Queen. Music will be supplied by the Kritters, one of the leading bands in the country and should be the perfect ending to a perfect day. The dance will be held in the downstairs lounge and will last till 12 p.m.

TV Brings Lafayette To Calumet

Bell Telephone installs T.V. antenna.

PUCC will present educational television beginning with the spring semester.

Dean Carl H. Elliot reported that courses will be beamed by microwave relays from the West Lafayette campus.

The project received added impetus after the Hammond City Council approved a conditional use permit for construction of a 96-foot microwave relay tower on Calumet Campus property.

Illinois Bell Telephone Co. workmen will erected the steel tower on the Woodmar Avenue side of the campus just north of the Industrial Research Institute Building to facilitate transmission of education television.

Five video monitors with large screens will be installed in the lecture rooms to receive the programs which will be both live and taped.

An Illinois Bell spokesman said the installations are planned for completion early in December.

Last of Student Power

Last Monday night, a group of individuals met in the main conference room to discuss policy concerning student organizations and funds at this meeting; comprized of three faculty members, two students, and the student affairs officer; two pieces of legislation were passed. They effectively squelch any student body reprsentation for budget recommendations. The budget is the only thing that the students have left. Well, kiss it goodbye.

"All school organizations are now responsible directly to the student affairs committee. They also get their funds directly from the committee. This includes the Purdue Music Organization, the debate team, and the theater company; which was th actual reason that the new system came about.

On the heels of the first ruling came a move to transfer the funds of the drama club to a set of books under the term "Speech and Creative Arts section. According to the sponsoring faculty member, this section defines itself. This places 28% of this year's student activities fees in the hands of the faculty under the label of culture. And what is the "Speech and Creative Arts Section?" For those of you whose poor minds can't seem to pin this nonentity down, call it a theater company. You might also care to venture a guess as to who it is that doesn't want student congress to have anything to do with the theater budget.

Although there are two students on this committee, the very fact that these measures were passed overt the overt disapproval of the student membership and in the face of an alternate plan to give the student senate the chance to review all budgets before sending them to the committee, it is obvious that these students have little real power. It would never do it seems to have the theater budget be exposed to student scrutiny.

So there it is. The last vestige of student control is gone. For all the power and responsibility that the student congress now has, they might as well stay home on Wednesday evening.

Campus to Receive Grant

The Calumet Campus has received assurance of acquiring more laboratory equipment to update instruction in various sciences.

The assurance came from the Indiana Advisory Commission on Academic Facilities which recommended a $26,203 grant for acquisition of science equipment at this campus.

The recommended grant is subject to approval by the U.S. commissioner of education and appropriation of federal funds. It was among grants totalling $4½ million recommended by the commission for 13 Indiana colleges and universities to improve undergraduate instruction throughout the state.

The federal allocation to the Calumet Campus will be matched by an equal amount from the University, thus allowing a total of $52,407 for science equipment.

Prof. Richard J. Combs, assistant director, reported that procurement of equipment is proposed for physics, chemistry, biology, psychology and mechanical engineering technology instruction.

ANNAUL ADMISSIONS DINNER WILL FEATURE WILLIS

200 High School Administrators Will Attend

Some 200 high school administrators and guidance counselors from northwestern Indiana and Illinois are expected at the annual Admissions Dinner at the Calumet Campus today.

The event is designed to acquaint secondary school authorities with the wide range of instructional fields available to students at Purdue's regional campus in Hammond.

The dinner will feature an address by Dr. Benjamin C. Willis, professor of educational administration.

Preceding the dinner, Dean Carl H. Elliott, campus director, and faculty members will outline the new programs in engineering technologies, science and education offered at the Calumet Campus on the undergraduate and graduate levels.

Mel D. DeGraff, admissions officer, reported that invitations to the annual affair have been sent to administrators in public, parochial and private high schools in Lake County and Porter County in Indiana and south Cook County, Illinois.

Entertainment at the smorgasbord dinner will be presented by the Calumet Campus Choir directed by David Simpson.

Frosh Twins Have Differences

The Calumet **Boilermaker** now has the perfect example of parity for you physics students who have a hard time understanding this unusual phenomenon.

A pair of freshmen, Pam and Candy Vergin are identical twins. Since they are two different people, however, they do have their differences, but looks are not one of them.

Pam, a pre-vet major, is a mere five minutes older than her sister Candy, who is studying for a degree in elementary education. They have been Indiana residents all their lives, and attended Hammond High School. Of all their many hobbies, singing and horseback riding head the list.

Not only do the girls give their relatives a hard time, but their teachers have a hard time distinguishing between them also. Candy had a history teacher in summer school a few years ago who was a very friendly person, and who always said "Hi, Candy" to either of the girls as he passed them in the halls. He didn't have any idea that there were two of them around until the last day of school when they both walked into his office at the same time. After a triple-take he somehow knew the kind of mistake he must have been making throughout the whole summer.

We were told that the yearbook at Hammond High had some trouble with their pictures once or twice, but the explanation which they offered was a bit too complicated for us to print without adding another page. But if you would like to know about it, just ask Candy. (Or was that Pam???)

Inter-Campus Communication Seen In Future

Prof. Richard J. Combs, assistant director of PUCC commented that the telecasts will include graduate courses in nuclear engineering, electrical engineering, and live broadcasts of engineering seminars at the School of Electrical Engineering.

Courses in agriculture, astronomy, psychology, entomoloy, chemistry, education, industrial management, engineering science and nutrition are also beong considered.

Future plans consist of expanding the telecasts to feature instruction in forestry, conservation, elementary education and additional courses for the general public.

Installation of similar microwave relays are slated for Purdue's regional campus in Indianapolis, the Indiana-Purdue University regional campus in Fort Wayne and the Indiana University main campus in Bloomington.

Combs stressed that the telecasts will serve as instructional aids to the instructor. He also added that television can be a tremendously effective tool when applied in the right way.

"The new electronic link to the regional campus," he stated, "is an excellent example of putting the new technology to work."

Purdue's Television Unit in West Lafayette was established in 1956 to assist the total instructional effort and to provide public service programs for home viewers.

Today, it has two studios, two control rooms and video-taping facilities with 20 full-time professional staff members. James S. Miles, a leader in educational television, is head of the staff.

This semester 80 to 85 hours of televised instruction involving 25 universities courses and 5,000 students will emanate "live" or by means of video tape from TV Unit facilities. Also, the unit will produce approximately 100 broadcast programs for the general public over some 25 educational and commercial stations.

As interconnections with the regional campuses develop, provisions will be made for "talk-back," too. Two-way radio lines will permit students at distant points to ask questions of the TV professor.

"It will be a momentous occasion for TV unit staff when students at Hammond, Fort Wayne, and Indianapolis can be part of the main campus instructional scene by simply turning a switch," Combs concluded.

Pipers Vie At I.T.C. Tonight

The Calumet Pipers take on Illinois Teachers College in Chicago tonight for their second game of the young season. Friday will find the Pipers at home to entertain Milwaukee Institute of Technology at the spacious National Guard Armory. With these games out of the way, the Pipers get down to business Saturday for the homecoming game to be played at Munster Fieldhouse, 8824 Columbia Avenue. This clash pits Marion College, undefeated at this writing with impressive wins over Huntington and Oakland city, against the aggressive lads of PUCC.

The pipers have performed admirably in two pre-season contests. In the first they defeated the National Guard team 120-36 in a game that shouldn't even have been allowed. The second game found the Pipers on the short end of a 105-80 score. The opponents were called Davis Sports and their roster included such well-known players as Nick Mantis, former Northwestern and New York Knickerbocker star, Bobby Cantrell, East Chicago Washington's Trimble award winner and the playmaker who made stars of Bill Bruntin and Cazzie Russell, and Bob Tolan, who played for PUCC before transferring to Eastern Kentucky State and leading the team and conference in rebounds.

A 25 point defeat may not sound like an admirable performance but Coach Hayes says he doubts if PUCC will play any teams during the course of the season which would be of the caliber of Davis Sports.

Bright spots for PUUC included Rex Burton, who outrebounded Tolan and scored 15 points. Kenny Goodwin was a pleasant surprize. "Slink" scored 18 points to lead the Pipers and always seemed to be in the right place at the right time. The Pipers showed good speed at times with guards "Hank" Hankins and Lonnie Chase out-hustling everyone on the floor.

Nick Mantis led all scorers with 37 points. He was followed by teammate Don Wright, formerly PUCC, who chipped in with 21. Bobby Cantrell and Bob Tolan helped the Davis cause with 18 and 17 points respectively.

PUCC scoring was as follows: Goodwin 18, Burton 15, Ferguson 12, Chase 9, Hitdlebaugh and Dan Wright 8, Ware 6, Hankins 4 and Kirk 2.

A trip to the armory on Friday night could prove worthwhile but don't miss the homecoming Saturday for anything less than a trip to the Rose Bowl. With all of the festivities planned plus Coach Hayes' fan dance at halftime, it could turn out to be the game of the year. The game starts at 7:00 p.m. Late comers will be seated on the rafters.
